

Worksheet biology

Grade 10th

Chapter 10

Name the followings

1. Granules present in cyton
2. Small extension from the cytoplasm of the cyton
3. Sheet of fibres connecting two hemisphere
4. Chemical released in synapse region during impulse transmission
5. Excited region of the nerve during conduction of nerve impulse
6. Covering of myelin sheath
7. Gaps between myelin sheath
8. Neuron carries impulse from sense organ to main nervous system
9. Fluid inside meninges of brain
10. Three coverings of brain

Question answers

1. Which cell organelle is absent in neuron? What is the function of that cell organelle in dividing cell.
2. Explain the structure of neuron with the help of neatly labeled diagram.
3. Differentiate between spinal cord and brain
4. What are natural and conditional reflex?
5. What is reflex arc.
6. Differentiate between sympathetic and parasympathetic nervous system
