

## # Longwave Diathermy (L.W.D)

- Longwave Diathermy treatment based on the Capacitor field method
- It can work in heavy voltage fluctuation
- Long wave can be used as an alternative for S.W.D application
- It is portable & light weight

## # Parameters

- Frequency → 0.3 - 1 MHz
- Wavelength → 300 meter
- Duration → Around 30 min
- Power → Variable

Note Longwave is much much better & superior modality for relieving pain, compared to Short wave & Ultrasound.
