

Water/Land pollutant:

- 1.sewage
- 2.Agricultural waste
- 3.Fertilizers
- 4.insecticides
- 5.Oil spillage
- 6.Thermal pollutant

Air pollutant:

- 1.Particulate matter
- 2.Oxides of Nitrogen NO
- 3.Oxides of Sulphur SO
- 4.Oxides of Carbon CO

Pollution:

pollution is the introduction of toxic materials or chemicals in the environment (air,land,water) in a percentage or proportion that undergo or destroys the life of plants,animals,human_being and properties.

Types of pollution:

we have 3 types of pollution

- 1.Air pollution
- 2.Land pollution
- 3.Water pollution

1 Air pollution:

Air pollution,is the introduction of toxic materials into the air in a proportion that is harmful to the plants,animals and human-beings.

Air pollutants:

- 1.particulate matters
- 2.Oxides of Carbon
- 3.Oxides of sulphur & Oxides of Nitrogen
- 4.Gases of hydrocarbon,chloro-floro-carbon (c.f.c)

1.Particulate matter: Originated from industrial processes and burning of woods, coal as smoke soot and dust which damage respiratory system lead and lead ii compounds(e.g lead bromide(
