Dear Ubisoft!

I choose to apply to Mission Artist because I am a big fan of gaming in general and I always wanted to help/create a gameplay mission that is fun and thrilling for your company especially because your game accomplishment has been huge! I am a very active and happy person, I always do my work done and if needed to work overtime I am able to handle such hard but enjoy full work.

My self

When I was, about 5 years old, I met my parents in Denmark who took good care of me. There I had my education in Skansevejens School 1st to 9th grade school, Aalborg Tech College where I learning now to become a Data technician in programing and I plan to go at Aalborg University where I will learn to work with 3D Animating and upgraded my rank from Data technician to and Tech Engineer in programing.

Why choose me

There are many job applications coming through with great people with great skills. However, I am able come up with fresh ideas for games no matter the platform, plus I can and will improve day by day, and this job is my dream and I will not give up until my dream job will be true to work for this company with great people and great fans.

Sincerely *Alexandru*
