

feel deep emotions

-The main emotion is fear or anxiety

-Borderline Personality Disorder

-they have relationship w/ people that are very intense + unstable

-they are moody, manipulative, untrusting of others,

emotions are often too much and inappropriate, + confusion over identity issues

-Causes: A troubled childhood, poor mother-infant relationship during the years in which the identity is forming

-Avoidant, Dependent, Obsessive-Compulsive

-Causes of Personality Disorders:

-Psychodynamic Theorists: blame the development of the ego in the anal stage

-Cognitive Theorists: certain behaviors during childhood that involve shaping, modeling, and reinforcing,

-Biological: Personality disorder can be passed down through relatives

-Disturbances in family relationships + Communication

-neglect, child abuse, overly strict parents, parental rejection
