The screenshot shows the 'AlertPay Account Login' form. On the left, a vertical sidebar lists four steps: 1. Create, 2. Information, 3. AlertPay Account, and 4. Validate. Step 3 is highlighted with a green circle. The form itself has several sections: 'Email Address' (with a red '1' and a note 'Your email must be in the format: name@domain.com'), 'Re-enter Email Address', 'Password' (with a red '2' and a note 'Your password is required to login to your AlertPay account'), 'Re-enter Password', 'Transaction PIN' (with a red '3' and a note 'Your Transaction PIN will be required for all transactions'), 'Re-enter transaction PIN', 'Password Recovery' (with a red '4' and two security questions), and 'Sales Venue' (with a red '5' and a question 'Will this account be used to generate revenue...'). The 'Sales Venue' section has a radio button selected for 'Yes'.

Here you need to keep in mind these things:

- the PIN number you choose at 3 note it down somewhere because you'll need it when and if you will have issues logging in your account;

- the password you choose make it more difficult to guess (something like: @rft?-thif)

3. The third method is very easy:

In the above forums you can make deals with the other forum members. This deals consist mostly in exchange of referrals – you give some referrals to the other person at a ptc website and he gives you referrals to another ptc website; you join a ptc from another member's list and he joins to a ptc in your list.

This method is not that great but if you don't have any other ideas you can get some good referrals this way.

4. This fourth method can bring you many referrals to the ptc sites. If you use it the right way you can bring quite a lot of referrals to ptc sites.

This is about using the referrals websites. What are the referrals websites?
