

putting it on myself as a demonstration.	horn and how the shoe horn could be used on any kind of shoe by taking the wide end of the shoe horn and pushing it down at the back of the shoe so that my heel. After I did this I asked the service user if they needed me to help them with the shoe horn.
Once the service user has put the shoes on ask if the shoes need to be fastened.	After the service user put their shoes on I asked them if they liked their choice of foot footwear and if it needed to be fastened.
Ask if the service user likes their choice of clothing.	I then asked if they liked their choice of footwear and if they found it easy to use the shoe horn

I would first ask the servicer if he/she would like to wear Velcro strapped shoes.

Velcro is an adhesive material which enables the surfaces of the straps to be brought together to stay in place. Velcro is used for service users that have limited movement and those who are unable to fasten buttons, skirts, trousers or shirts, or to do up shoelaces.

Velcro can also be used on clothes for example a T-shirt, a blouse, and a hat etc.

Using Velcro shoes	Care workers 'role when providing support
Assess the situation	I assessed the situation by knocking on the service user's door and asking if I could come in. I then introduced myself and asked if I could sit down. I sat next to the service user making sure that I respected their personal space and asked them how they were feeling.
I would find out what the service user would like to wear.	I asked the service user what kind of shoes they would like to wear and if they would like me to get the shoes for them.
Demonstrate how to use the shoes with Velcro.	After I went and got the pair of Velcro shoes I faced the service user and
