

```
var text, regE;

text = prompt("Enter something");

regE = /[abc]/;

if (regE.test(text) == true)
{
    alert("Matches pattern");
}
else
{
    alert("Doesn't match pattern");
}

</script>
```

What is a web stack?

You must know about:

- Operating System
- Web server
- DBMS
- Server side scripting language

This is important for compatibility

```
regE = /^abc$/;
```

```
if (regE.test(text) == true)
{
    alert("Matches pattern");
}
else
{
    alert("Doesn't match pattern");
}
```

```
</script>
```

- [] denotes a range of characters

```
<script>
```

```
var text, regE;
```

```
text = prompt("Enter something");
```

```
regE = /[abc]/;
```

```
if (regE.test(text) == true)
{
    alert("Matches pattern");
}
else
```
