

How To Make Simple Text Editor in C#

1. Build your form

You need textbox, two Buttons, SaveFileDialog and OpenFileDialog .
And make the text box **MULTI LINE**

Add a string variable “**name**” (this must be **public**)

```
public partial class Form1 : Form
{
    string name;
    public Form1()
    {
        InitializeComponent();
    }
}
```

Add a namespace System.IO;

```
using System.IO;
```

1. Write tis code for Open button

Add a string variable “**name**” that means the file name.

```
string name;
if (openFileDialog1.ShowDialog() == DialogResult.OK)
{

```
