Computer Process

Flowchart

- >storage of data (in programming)
- >has different types

Variable

- >Integer (Int)
- >Double (Double)
- >Character (Char)

Boolean

- >type of data answerable only by yes or no.

Characteristics

- >destructive
 - destroys value after processing
- >constructive
 - maintains value after processing

Temporary storage

- for mixing data

A simple decision follows

syntax, single line openline,..

boolean expressions using operations.

comparison > < =

not equal to (<>) (>=)

boolean operators

if true its true

Or - if one of 2 conditions is true then answer is true

And – Both should be True

if today is monday and tomorrow is tuesday then true

if today is monday or tomorrow is wednesday its true

expression 1 is true expression is true..

and 2 cond true. true

or 1 true. true

exp 1 exp 2 is false . or true. and false.

false 1 true 2

or true.and false.

false false 1 and 2

or false. and true.

Cond – Condition

Exp - Expression
